CEN 4072: Software Testing- Final Project – Power Point requirements

Slide 1:

- Project Title, Instructor name, Course Name, Team members names.

Slide 2:

- Goal of your project and motivation (State what difference will your tests make to the system)

Slide 3:

- Workflow diagram of your project

Slide 4:

- Highlight individual member test contributions. Power point and report should be the contribution by everyone in the group.

Slide 5:

- Tools used: a list of software testing tools used for the project.

Slide 6 and more:

- High-level summary of the system and your tests
- **Option1**: Explain every unit/Integration of each of your testing (Screenshots/ cut paste of your passed tests with modules)
- **Option 2**: The code should be clear on the screen you may walk through your IDE if you can enlarge and explain.

Last Slide: Conclusion and future works, TestNG reports and add references after this last slide.

After the presentation you need to show all your classes, execution and all passed test cases.

Note: You must screen record your work, and you will have to use it if your execution gets delayed (must) and you may reorder the slides as per your requirements and that is fine.
